THE MUTUAL TRANSITION OF THE ORTHO-, PYRO-, AND METAPHOSPHORIC ACIDS INTO ONE ANOTHER ON HEATING. [1962] 9p. 2 refs.
Order from SLA \$1.10

63-10484

Trans. of Zeitschr[ift] für Anorg[anische] Chemie
(Germany) 1910, v. 67, p. 234-241.

DESCRIPTORS: *Phosphoric acids, Transformations, Heating, Vapor pressure.

It was found: (1) that in increasing the water-vapor tension over heated orthophosphoric acid the temperature of formation of the pyro- acid rises faster than that of the meta- acid. (2) On account of the volatility of the meta- acid the investigation could be carried only to a relatively low temperature so that the anticipated meeting of the curves of temperature formation for pyro- and meta- acid, that is, the direct transition of ortho- into meta- acid, could not be reached.
